Lesson Measurable Learning Objectives:

The student will construct a graph of his/her grades from last year and the reporting period of the current year in order to assess his/her strengths and weaknesses.

Lesson Formative Assessment (acceptable evidence):

Assessment should relate to the performance outcome for goals, objectives and GLE. Assessment can be question answer, performance activity, etc.

Students will self-assess by analyzing completed graphs of academic ability and performance and comparing results to requirements for career goals.

Lesson Preparation

Essential Questions:

How does my academic performance affect later career/education choices?

Engagement (Hook):

The counselor will ask the students if they have ever seen people looking at graphs to analyze data. Ask students to provide examples. Project or display examples of graphs. Counselor asks the students why businesses analyze information such as this.

Procedures

Instructor Procedures/Instructional Strategies:	Student Involvement/Instructional Activities:
<p>1. After the hook, the counselor tells the students that today they are going to graph information regarding personal performance in school. The counselor will provide students with their individual grades. These grades could be from last school year and the first reporting period of the current school year or a series of bi-weekly or progress reports. Students will create a line graph with all courses plotted on the graph. The counselor will provide students with graph paper and colored pencils. Students will be instructed to plot the grade on the vertical axis and the reporting period on the horizontal axis. Students will be given enough colored pencils to graph each subject with a different color. If a school district has access to computers, students could create the graphs electronically in a spreadsheet program.</p>	<p>1.
